

EDP

Advanced users

A majority of users acquire program skills through „learning by doing“. However, many of the program features may take longer to learn doing it that way. In comparison, well-founded program knowledge helps the user to work more efficiently and increases his work performance, and possibly his income. This course is designed for users who are already familiar with the program; however, do not utilize the full range of program options. Many previous participants noted: *“Too bad I hadn’t known these program features before!”*

For whom is this course useful?

Users with good basic skills, who would, however, like to improve on their EDP skills and bring them to a higher level

Your benefit

Through this course you are well prepared for the competition with qualified skills and higher wage capabilities.
